Abstract

BSC is a blockchain-based decentralized platform that aims to build a free, global digital content entertainment system with distributed storage technology, and allows easy and cost-effective sharing of digital content. Token known as GABX has initially a 250 Millions supply with 8 digit precision. 100 millions token (GABX) will be in- market circulation where 150 millions token will be used by the company for system maintenance and company promotional activities.

About GABX

GABX initially run on the BSC Blockchain with BEP 20 standard. Binance Smart Chain is a recent development that benefits its users with a rich and growing digital asset ecosystem like never seen before in the decentralized Exchange spectrum.

GABX is the cryptocurrency issued by Binance Smart Chain and trades with the BNB coin. Binance Smart Chain is an independent blockchain that runs in tandem with the Binance Chain.

Introduction of GABX

GABX Is Binance Smart Chain (BSC) Based (BEP-20) Token Purpose is to use in as trade on Exchange for lower and minimum fees. We dislike inflation so we created a system that can fight it. Many people in the world have been affected by inflation and we aim to create an ecosystem that saves people from the negative effect of holding FIAT currency and being under the central bank's control.

Management

The group is completely dedicated to the Improvement and age of the Company. Out-of-the-box thinkers having a clear vision, management, and leadership skills help organizations record unprecedented success on the business front. This is why we have decided to trust the most experienced professionals at every level. Good management consists of showing average people how to do the work of superior people.

Benefit of Cryptocurrency

It is not governed by any central authority or financial institution, rendering them immune to government interference or manipulation. This is called having a decentralized system. The supply and value of virtual currencies are controlled by the user themselves. Cryptocurrencies are digitally mined. Mining Precious metals have been used as a means of giving value to money.

- ❖ **Easy Transaction**
- ❖ **Asset Transfers**
- ❖ **More Confidential Transaction**
- ❖ **Low Transaction fees**
- ❖ **Individual Ownership**
- ❖ **Adaptability**
- ❖ **Strong Security**
- ❖ **Potential to help the “Unbanked”**
- ❖ **Easier International Exchanges**

Blockchain

Blockchain is a secure record of every single Transaction made using a cryptocurrency.

The Verified transaction is added to the blockchain as part of the mining process.

Mining I therefore not just about creating new money but also validating transactions.

With cryptocurrency, the task is undertaken with blockchain using a form of math called cryptology.

Mission & Vision

GABX was founded on the belief that it is your basic human right to control your money, data, and identity. We believe that decentralization holds the key to empowering people around the world to better safeguard their rights and that we are helping the world move in this direction by accelerating the transition to adopting cryptocurrency.

Platform

Token doesn't have a Manager. There are the creators of the Smart contract who works within the Binance Blockchain. This suggests that the platform is fully decentralized. The key points of GABX are eliminating excessive incentives, distributing rewards fairly, and removing financial barriers for small-scale investors.

Why Chose GABX?

Transparency- GABX will increase transparency in transactions by providing detailed and real-time logs of all transactions. We will be as transparent as possible while remaining competitive.

Community Driven- Making money is good, but making money together is even better. We choose to share our success with the world to enhance the living standards of communities, your families, and your bank accounts.
